ALLEGION COMMITTED TO EDUCATION AT ANNUAL ALOA CONVENTION AND BEYOND

Leading Security Solutions Provider To Train Attendees On Top-line Products

CARMEL, IND. (JULY 27, 2016) – [Allegion](#), a leading provider of security solutions for homes, businesses and institutions, announced it is scheduled to lead two product-specific educational sessions and an interactive skills challenge during the [ALOA Convention and Security Expo](#), July 31 – Aug. 6 in Orlando, Fla.

Allegion will be located at Booth 417 inside the Hilton Orlando, and will invite attendees to participate in The Ultimate Locksmith Challenge, a test of installation speed and accuracy. Locksmiths will be given the opportunity to test their hand at installing an LCN® aluminum closer and/or Schlage® NDE Series lock. Awards will be given to the top three contestants in each product category.

Throughout the convention Allegion plans to provide locksmiths with a variety of different training opportunities, including two educational sessions during the conference.

- **Introducing the Everest SL Cylinder**
Aug. 5 at 7:30 – 10:30 a.m.
- **Schlage Everest 29 Primus XP**
Aug. 6 at 7:30 – 10:30 a.m.

“At Allegion, we understand locksmiths greatly benefit from credible educational resources because it provides them with the knowledge to go into the field and execute their job at the highest level and ultimately increase their effectiveness,” said Paul Seitz, Business Leader, Schlage locks and key systems at Allegion. “We are committed to positioning ourselves as that resource for locksmiths.”

Visitors to the booth will also have an opportunity to meet with Allegion trainers to address questions about the latest product offering and installation tips. Trainers will provide first-hand knowledge of Allegion products, how each series differs and how to utilize them to provide a more convenient solution for customers. The following newly-released products will be featured at the trade show:

- [Schlage Electrified ND Cylindrical Lock](#) – The Schlage electrified ND Cylindrical Lock has been completely redesigned with new features including autodetecting 12/24V input, switch-selectable EL/EU, “plug in” RX, and low current draw for incredible flexible and energy efficiency.

- [Schlage Everest 29 SL](#) – The SL cylinder with the Schlage L-Pin innovation combines the traditional top cut key with a side bar design. This design allows Schlage to provide a traditional Key-In-Lever design that incorporates the Schlage SFIC key systems of Everest B and Everest 29 R.
- [LCN Cast Aluminum Closers](#) – The new LCN cast aluminum door closers were specially designed to deliver consistent, dependable, long-term performance with the industry's most common hole patterns. The patented LCN design features a cast aluminum body, full complement bearing, peel-n-stick templates, and offered in six available standard finishes, as well as custom colors.
- [Von Duprin Concealed Vertical Cable System](#) – One of the most challenging aspects of exit devices has been the proper installation, adjustment and maintenance of concealed vertical systems. The newest Von Duprin Concealed Vertical Cable System (CVC) eliminates these costly frustrations with new field sizeable cables that cover a wide range of door opening heights, which simplifies the ordering, stocking and maintenance process.

ALOA is the world's largest organization dedicated to locksmiths and other security professionals, providing educational programs and assets to enhance career development throughout the industry.

The organization is making an effort to provide veterans with job training and apprenticeships, following GI Bill funding approval for up to 376 hours of training for our nation's veterans.

To demonstrate its unwavering support to veterans, Allegion has joined in this effort as an inaugural sponsor to provide additional financial support to a veteran chosen by ALOA.

To learn more about how to help our veterans or about Allegion's presence at ALOA, please visit us.allegion.com/ALOA or visit Booth 417 during the conference.
