

Offline vs. online

The facts about smart locks for apartments

FACT

VS

FICTION

FACT

Electronic locks can operate offline without the need for smart apartment hubs

Offline smart locks are an easy way to begin building your technology offering.

FICTION

Community Wi-Fi is necessary to use smart apartment locks

Electronic smart locks can operate in offline mode without Wi-Fi. You will still enjoy many of the benefits of electronic access control.

FACT

Mobile credentials are possible with offline locks

With the right technology, residents will love the convenience while you reap the benefits of the No-Tour functionality with Schlage Mobile Access Solutions.

FICTION

Residents must have cell service to use Schlage Mobile Bluetooth® Credentials

Our mobile credentials work without cell service or data once downloaded to a device.

Benefits of offline smart locks

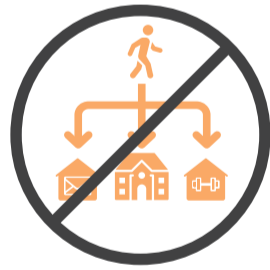

Manage credentials from anywhere

Enjoy keyless access

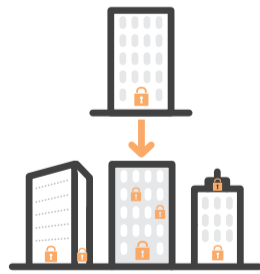

Audit trails available

No need to tour locks

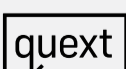

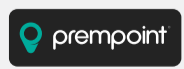

Eliminate rekeying

Evolve from offline to online as needs change

Works with Allegion's ecosystem of software alliances
