Keyway definitions

Open keyways

Everest and Everest 29 Open (C and S Key Sections)

Everest and Everest 29 Open (C & S keyways) include non-Primus products with Everest C and Everest 29 S keyways and key sections. Schlage only sells Everest and Everest 29 Open products to commercial security professionals. Commercial security professionals purchasing Everest and Everest 29 Open products from Schlage are permitted to stock and to originate or duplicate keys without signature verification.

Purchasers of Everest and Everest 29 open (C & S) are permitted to resell the products in accordance with their distribution agreement to end users and to other commercial security dealers who have a professional locksmith on staff but are expressly prohibited from selling to:

i) Any residential retail outlet.
ii) Any individual or entity purchasing or selling products through any method of auction.

Standard Classic (Obverse) Key Sections - no restriction

Standard keyways are Classic (Obverse) C, CE, E, EF, F, FG, G, H, J, K, L.

Restricted keyways

Everest B, Everest 29 R

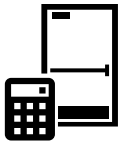
All Everest and Everest 29 SFIC (B and R Families) keyways are restricted.

Everest D, Everest 29 T

All Everest D and Everest 29 T keyways are restricted.

Quad, Numbered ("Paracentric") and Reverse Keyway Family Policy

These keyway families do not require a letter of authorization from the end-user and not available for new master key systems. Orders can be submitted for plugs, 0-bitted and 1-bitted, master keyed, and key blanks; keyed random is not available.



Online ordering is available through Overtur™ Estimate and Order (OEO)

OEO offers much more than placing online orders including:

- Provides net price for direct customers and list price for indirect customers, integrator partners and end-users
- Online Ordering for direct customers
- Automated price updates
- Ability to export price lists and cross-reference guides in Excel
- Configuration and configuration reports, including e-lock configurations
- Request a quote or quote revision from an estimate

RESTRICTED KEYWAY POLICY

Everest B, Everest 29 R - All Everest and Everest 29 SFIC (B and R Families) keyways are restricted.
When ordering a new keying system, include the following:

- Job (end-user) name, city, state and zip code.
- Letter of Authorization (LOA) – Authorized ship-to address for key blanks, cores and cut keys on end-user's official stationery. See page 302 for sample letter of authorization.
- Numerically defined specifications for expansion of all branches of the key system.

The factory will assign a "facility code" which will appear on all keys and blanks for this job. When ordering additions to an existing keying system, include the following:

- Job (end-user) name, city, state and zip code.
- Facility code previously assigned by Schlage and stamped on all existing keys and blanks.
- Registry number of the keying system as established by Schlage.
- Letter of authorization on end-user's official stationery is required when:
  - End-user places order with new dealer.
  - Order is to be drop shipped to a different ship-to address than originally authorized by the end-user. See page 302 for sample letter of authorization.

Bitting list (transcript) orders require a letter of authorization on the end-user's official stationery. Prevailing prices apply.

Everest D, Everest 29 T - All Everest D and Everest 29 T keyways are restricted.
When ordering a new keying system, include the following:

- Job (end-user) name, city, state and zip code.
- Letter of Authorization (LOA) – Authorized ship-to address for all products on end-user's official stationery. See page 302 for sample letter of authorization.
- Numerically defined specifications for expansion of all branches of the key system.

The factory will assign a "facility code" which will appear on all keys and blanks for this job. When ordering additions to an existing keying system, include the following:

- Job (end-user) name, city, state and zip code.
- Facility code previously assigned by Schlage and stamped on all existing keys and blanks.
- Registry number of the keying system as established by Schlage.
- Letter of authorization on end-user's official stationery is required when:
  - End-user places order with new dealer.
  - Order is to be drop shipped to a different ship-to address than originally authorized by the end-user. See page 302 for sample letter of authorization.

Quad, Numbered ("Paracentric") and Reverse Keyway Family Policy
A letter of authorization from the end-user is required for all orders for restricted keyway plugs, 0-bitted and 1-bitted products and all key blanks. Restricted keyway products are not available keyed random. The letter of authorization must include the address in which the materials will be shipped. Keyway or keyway family must be referenced in the letter. Letters must be dated and signed by the end user. Letters dated more than 6 months prior to the order submission date will not be accepted. Letters for projects that are ongoing may be older than six months if effective dates are referenced in the letter. With the exception of the signature, all other information must be typed.

Allowable End User Authorizations for Restricted Keyways:
The end user can authorize a dealer or distributor to order and inventory products if they so choose. This authorization requires the submission of a fully completed "Letter of Authorization" or "Signature Card", depending on the product type requirements, by the end user to Schlage.

CONSTRUCTION CORE PROGRAM POLICY

Full size and small format construction cores will be invoiced under standard payment terms. Credit for these cores, less the handling charge, will be issued upon their return to the factory. Please contact customer service for return authorization. Customers may not deduct payment for construction cores prior to completion of their authorized return.

CONTROL KEYS FOR INTERCHANGEABLE CORES

A single control key will be added to orders containing interchangeable cores where a new masterkey system, master key system expansions requiring a different control key and all construction core orders are placed and does not include a control key on the purchase order. Construction core orders will include both a control and user key.

PRIMUS®/ PRIMUS XP SALES POLICY

Primus High Security cylinder products manufactured by the Schlage Lock Company are offered for sale through specific channels of distribution, based on stocking requirements and security levels. Possession of this price book or any other Schlage price book does not constitute "the right to purchase" Primus products.

Important: In stocking levels where purchase agreements are required, a fully executed purchase agreement, including initial minimum inventory order, must be in place before any Primus products may be quoted or purchased. Contact your RSO Consultant for specific details.

The prices contained herein apply to Primus Levels 1 through 9 with respect to the actual product. Availability of product is subject to additional conditions as follows:

Classic Keyways

PRIMUS/PRIMUS XP LEVEL 1: For retail locksmiths and Schlage dealers. Standard nationwide side bitting by keyway. Stocking level requires a separate Primus/ Primus XP agreement. Initial inventory commitment required for distributors but not for participating locksmiths. Obverse keyways only. HP, JP and LP section keys are not available.

PRIMUS LEVEL 1 PLUS: For retail locksmiths. A side bitting is assigned on a nationwide exclusive basis to a specific Schlage wholesale distributor. Stocking level which requires a separate Primus purchase agreement and an initial minimum inventory purchase by the wholesaler and the locksmith. Obverse keyways only. HP, JP and LP section keys are not available. Cylinders are always furnished less key blanks (LKB).

PRIMUS XP LEVEL 1 PLUS: For retail locksmiths. An exclusive side bitting is assigned to dealer within the first three digits of the dealer physical location zip-code. Distribution through direct Schlage dealers. Stocking level which requires a separate Primus purchase agreement and an initial minimum inventory purchase. Obverse keyways only. Cylinders can be ordered LKB, KD, KA or MK.

PRIMUS/PRIMUS XP LEVEL 2: For Schlage dealers and large commercial locksmith businesses. Exclusive side bitting is assigned to dealer by time zone. Distribution through direct Schlage dealers. Stocking level which requires a separate Primus purchase agreement and an initial minimum inventory purchase. Obverse keyways only.

PRIMUS/PRIMUS XP LEVEL 3: End user level not stocked by dealers. Key systems are assigned a side bitting exclusive within 2-digit zip code (Level 3G) for orders of 60 - 1,999 Primus cylinders. Orders of fewer than 60 Primus cylinders are randomly assigned a side bitting from a small nationwide pool of side bittings (Level 3U). Distribution through Schlage dealers and Schlage wholesale distributors. Obverse and Quad keyways only.

PRIMUS/PRIMUS XP LEVEL 4: End user level not stocked by dealers. Key systems are assigned a side bitting exclusive within a time zone (Level 4Z) for orders of 2,000 - 3,999 Primus cylinders. A nationwide exclusive side biting (Level 4N) is assigned to key systems of 4,000 or more Primus cylinders. This exclusivity can be purchased for a separate fee for smaller quantities of cylinders. This price book does not contain the fee schedule. Contact your RSO Consultant for specific information. Distribution through Schlage dealers and Schlage wholesale distributors. Obverse and Quad keyways only.

Everest® Keyways

PRIMUS LEVEL 7: For retail locksmiths. Side bitting is assigned on a nationwide exclusive basis to a specific Schlage wholesale distributor. Stocking level which requires a separate Primus purchase agreement and an initial minimum inventory purchase by the Schlage wholesaler and the locksmith. Same as Level 1 PLUS above, but with Everest S Family keyways only.

PRIMUS XP LEVEL 7: For retail locksmiths. An exclusive side bitting is assigned to dealer within the first three digits of the dealer physical location zip-code. Distribution through direct Schlage dealers. Stocking level which requires a separate Primus purchase agreement and an initial minimum inventory purchase. All Everest 29 key sections. Cylinders can be ordered MK, KA, KD or LKB.

PRIMUS/PRIMUS XP LEVEL 8: For Schlage dealers and large commercial locksmith businesses. Exclusive side bitting is assigned to dealer by time zone. Distribution through direct Schlage dealers. Stocking level which requires a separate Primus purchase agreement and an initial minimum inventory purchase. Equivalent to Level 2 above, but with Everest S Family keyways only.

PRIMUS/PRIMUS XP LEVEL 9: End user level not stocked by dealers. Key systems are assigned varying degrees of geographically exclusive side bittings based on a sliding scale of purchase commitment or separate fees. This price book does not contain the fee schedule. Contact your RSO Consultant for specific information. Distribution through Schlage dealers and Schlage wholesale distributors. Level 9U, 9G, 9Z, and 9N are equivalent to Levels 3U, 3G, 4Z, and 4N above, but with Everest S and T Family keyways.

The following side bit milling exclusivity criteria apply to both levels 3, 4 and 9:

- 1- 60 cylinders-Random assignment
- 61-1999 cylinders-First two digits of zip-code
- 2000-3999 cylinders-Time-Zone Exclusivity (also available for $10,000 fee for an organization who would like this exclusivity and doesn't meet cylinders quantity requirement).
- 4000 + cylinders-Nation Wide Exclusivity.(also available for $40,000 fee for an organization who would like this exclusivity and doesn't meet cylinders quantity requirement).

Important ordering information

See Forms and Examples: Primus and Everest 29 Primus Ordering Checklist for a checklist of information required to process a Primus order. Note that, for security reasons, all end user Primus levels (Level 3, 4 and 9) require a Facesheet (MS-E120) bearing an original signature. Opening orders for end user Primus levels also require a Signature Card (MS-E130) bearing original signatures. Facesheets and signature cards are used to authenticate the end user request for product, therefore orders received without the correct supporting documents (or without original signatures) are subject to delays or cancellations. Blank Facesheets and Signature Cards are included in the Forms and Examples section of this price book for your reference. Additionally, electronic version of these forms are available at allegion.com/us.

The Schlage Lock Company reserves the right to make changes in designs and specifications, to make additions or improvements on its products, or to discontinue products without incurring any obligation. The Schlage Lock Company is not responsible for any modification, addition, or alteration to our products by others.

INVENTORY COMMITMENT REQUIREMENTS - COMMERCIAL LOCKSMITHS LEVELS			
Primus XP		**Everest 29 Primus XP**

Electronic validation from Schlage[1]

Electronic validation (e-validation) is an online system for the use of the end user to create electronic authorizations replacing the letter of authorization (LOA) and Primus Facesheet processes. This online validation system is designed to ease the burden of an end user providing authorizations for ordering restricted key and cylinder products on their behalf. Through this system, the end user can register for an online account with Schlage that will allow them to manage their shipping addresses, shipping contacts and additional authorized users for their restricted products. Through this system, they can then generate an electronic Facesheet that they can provide to the distributor of their choice to allow an order for restricted products to proceed. Enrolling in and using this feature will reduce the overall time for an order to be processed from the time that the end user has determined the need for product. The electronic Facesheet provided by the e-validation system can be faxed or emailed along with a distributors order reducing the time and energy required for original copies of Facesheets previously required. The system is for both new and existing restricted key system owners. For new restricted systems, a registration process will provide the ability to create the initiating Facesheet for the project.

Products/key systems eligible for e-validation:
Everest – B and D restricted family of keyways
Everest 29 – R and T restricted family of keyways
Primus – All keyway families that include the Primus feature
Primus XP – All keyway families that include the Primus XP feature

E-validation can be accessed at the following web address: https://mycredentials.allegion.com

DISTRIBUTION FUNCTION AND LOCATION POLICY

The Schlage customer relationship includes the nonexclusive area of primary sales responsibility and the channel of distribution assigned by Schlage. It is vital to our success and for the effective management of the distribution of our products that the Schlage customer relationship, once it is satisfactorily established between us, should not be changed without our approval. Therefore, after selection by Schlage as a distributor of one or more of Schlage products, a customer should continue to perform that distribution function from the location of its business at the place or places utilized at the time of selection. A customer should not change its Schlage distribution function or establish a different or additional location without the prior written consent of Schlage.

Schlage reserves the right to discontinue, after appropriate notice, sale of its products to any customer which refuses to adhere to this policy. Schlage also reserves the right to change, in its sole discretion, the number and locations of the distributors authorized to distribute its products in any area. This determination will be based upon, among other considerations, the success or failure in developing the market for Schlage products.

Hardware Finishes

Schlage Lock finishes are durable, top quality finishes obtained by the careful processing of solid brass, bronze, stainless steel or other materials. Where required, a protective clear coating is applied and cured under high temperature. It is important that climatic conditions and usage be taken under consideration when selecting finishes. This is especially true in areas subjected to strong corrosive vapors, humid climate or sea air which, in a short time, may have a damaging effect on metal finishes. The longevity and preservation of the finish appearance is determined by base metal and finishing process. Clear protective coating or other organic finishing applications may require different methods of cleaning and care. As an example, non-clear coated finishes should not be cleaned with soaps or any solvents; organically coated surfaces should periodically be cleaned with a mild, nonabrasive soap and buffed lightly with a clean cloth. The type of base metal and finishing techniques must be considered when applying any cleaning or preservative method. Contact the Schlage Technical Services Department for further information on the care of finished hardware.

In some instances, for customer convenience, the most appropriate BHMA finish symbols are used to indicate similarity of appearance, regardless of base metal of finishing process. A, CS, ND, F, FA, H, S, S200 Series and Dexter by Schlage levers are zinc-based material and are plated to match finishes indicated. L Series will utilize a brass material for 612 and 613 finishes. Finishes of latches, strikes, cylinders/cores, and visible mounting screws, though similar in appearance, may differ from the finish of the trim. Finish numbers in the 600 Series are the BHMA (Builders Hardware Manufacturers Association) industry standard.

COMMERCIAL FINISH CODES AND DESCRIPTIONS

The nearest old U.S. equivalent code designations are shown in parenthesis ( ).

Symbol	Description	Symbol	Description
605 (US3)	Bright Brass, Clear Coated	**622** (US19)	Matte Black, Coated
606 (US4)	Satin Brass, Clear Coated	**625** (US26)	Bright Chromium Plated, No Coating
609 (US5)	Antique Brass, Satin Brass, Blackened Satin Relieved, Clear Coated	**626** (US26D)	Satin Chromium Plated, No Coating
612 (US10)	Satin Bronze, Clear Coated	**629** (US32)	Bright Stainless Steel, No Coating
613[1] (US10B)	Oil Rubbed Bronze, Oxidized Satin Bronze, Oil Rubbed, No Coating	**630** (US32D)	Satin Stainless Steel, No Coating
619 (US15)	Satin Nickel, Satin Nickel Plated, Clear Coated	**643e**	Aged Bronze, Clear Coated

[1] Oil rubbed bronze (613) is considered a category "B" finish by ANSI/BHMA and will vary in color when applied to different alloys and forms of base material. 613 will also vary from production lot and additionally from one manufacturer to another. Oil rubbed bronze will wear off over time due to the "rubbed" finishing method that has no protective coating or plating.

1) Model number

Please reference pages 16-20 to pick your credential model number to assure you receive the correct technology, form factor and memory size. Below is how the credential model numbers are created but not every combination is available and there are some unique part numbers available.

Sample part number 8 5 4 3 M1

1. Technology
- 7 Proximity
- 8 DESFire EV1 or EV3
- 9 MIFARE Classic

2. Form factor
- 4 Clamshell
- 5 ISO Card
- 6 Keyfob
- 7 Adhesive patch
- 8 Combo keyfob
- 9 Combo ISO card

3. Memory
- 2 2K byte memory (available in EV1)
- 4 4K byte memory (available in EV1, EV3)
- 8 8K byte memory (available in EV1)

4. DESFire EV1 or EV3
- 0 DESFire EV1
- 3 DESFire EV3 (available only in 4K byte memory)

5. Other
- M1 Magstripe
- T Thin keyfob

Allegion offers an optional magnetic stripe encoding service. “Magnetic Stripe” Part Number and encoding instructions would need to be supplied as a separate line item on your purchase order. Please see page 20 for details.

2) CardTrax™

CardTrax format is a program designed to keep track of credential encoding and badge ID numbers to eliminate confusion in ordering sequential numbering and/or encoding details, and ensures duplicate cards are not issued. Cards will automatically be provided as “next in line” unless otherwise specified. Restricted CardTrax is an exclusive CardTrax Program for qualified end-user customers that provides global encoding protection. **If a CardTrax number is provided on your PO, manual encoding information is not required.** Please reference page 23 for more information on CardTrax.

3) Encoding information[1, 2]

All credentials are encoded with 3 main properties (in order): Bit Format, Facility Code, and Badge ID. Bit Format is the data structure of your credential and determines how many facility codes and unique badge numbers are available to use. Facility Code differentiates your site, or facility, from another site that might be using the same Bit Format and Badge range as yours. Not all Bit Formats use a Facility Code. Badge ID is the unique ID number on the credential that is associated with each user in your access control system.

COMMON BIT FORMATS:

BIT FORMAT	CROSS REFERENCE	FACILITY CODE RANGE	BADGE ID RANGE	PROX	SMART
26A	H10301	0–255	0–65,535	▪	▪
35C[3]	CORP1000 identical	0–4,095	0–1,048,575	▪	▪
37X	H10304	0–65,535	0–524,288	▪	▪
40X[3]		0–1,023	0–268,435,455		▪

Note: For other supported formats, please contact your Allegion Sales Consultant.

Important encoding notes:

1. Every credential order must include directions on how to encode the credential. Most commonly, this includes information like Bit Format, Facility Code (if applicable), and Starting Badge ID Number. Customers using a CardTrax Account to track their credential information can instead provide a CT number on the credential line on the PO. Do not attach additional credential-related documents to the PO. Orders without proper encoding directions will require order clarification and may be delayed. “Default Encoding” can be specified on the PO, which will be a 26A bit format and Allegion will choose the facility code and starting badge ID number. For all other encoding guidance, contact your Allegion Sales Consultant or electronicinsidesales@allegion.com before proceeding.
2. When ordering multi-technology credentials, the order requires credential encoding information for both the Smart and Proximity technologies if different encoding is preferred. One CT account can also be specified for each technology. The same encoding will be applied to both technologies if there is only one set of encoding information.
3. For CardTrax™ restricted program members only.

4) Slot punch

Available option on ISO cards. Vertical slot punch is always included in Clamshell credential (no extra charge). Punch indicator dots are on all stock ISO cards. ISO cards with mag stripe can only be punched horizontally. A per-card cost applies for this service. Reference page 20 for details. Allegion is not responsible for damage caused by slot punching provided on Schlage cards by any third party.

5) Card print scheme

Card print schemes are printed in various locations on ISO and clamshell cards and provide information about the credential or order. Print scheme 01 will be used if no other print scheme is specified. Please reference page 22 for available print schemes.

6) Custom artwork number

Please reference page 21 for more information on custom artwork.

7) Special instructions

Please include additional special instructions for your order. Most orders will not have special instructions. Special instructions may include a Cross Reference Sheet or a custom configuration (“CE-xxx-xxx” number). Custom configurations may also be associated with your CardTrax Account and would be automatically applied when a CT Number is specified on the order. A Cross Reference Sheet is a .CSV file containing all badge properties from your order that is used for advanced enrollment functions. Please see page 20 for more information on Cross Reference Sheets.

For more information and guidance placing a credential order, visit our Credentials How-to-Order Guide. You are encouraged to attach a populated Credential Order Template to your purchase order.

SCHLAGE CREDENTIAL TECHNOLOGY TYPES

Schlage offers a wide range of credential technologies and form factors.

Mobile credentials
Schlage offers a variety of ways to deliver mobile credentials to your students' and employees' phones. Using near field communication (NFC) or Bluetooth technology, a smartphone app works just like an ID card, providing more for your students and employees while enhancing the security of their credential. Easily assign credentials today using the access control software of one of our developer network partners. Schlage mobile credentials offer the highest level of credential security available.

Smart credentials
Ideal for facilities with moderate to high security needs, Schlage 13.56 MHz smart credentials put you in control by delivering smarter solutions. Using MIFARE® DESFire®'s EV Series or MIFARE Classic®, these credentials protect your most sensitive data by utilizing extra layers of security protection. Smart credentials can be used for many applications beyond access control including transit, cashless vending, and cafeteria point of sale.

Multi-technology credentials
Schlage multi-technology credentials are extremely flexible. Particularly useful during a transition from proximity technology to smart technology, these cards can be read by both proximity readers and smart readers. This allows your customers to economically migrate to the latest smart technology at their own pace.

Proximity credentials
Schlage proximity credentials are a solution for facilities with less demanding security needs. Utilizing 125 kHz proximity technology, these credentials are a cost-effective solution and can interface with many industry leading proximity readers.

Magstripe credentials
Schlage magstripe credentials are a solution for facilities with less demanding security needs. Utilizing magstripe technology, these credentials are a cost-effective solution.

Description	**Specify**	**Price**
A Credential Cross Reference Sheet (CRS) file can be provided with a credential order and contains the credential encoding details in a .csv format, commonly used for Active Directory imports to access control software. The Cross Reference Sheet **MUST** be included as its own line item on a Purchase Order (PO) to be included with the order.	Cross Reference Sheet	No charge

CUSTOM ARTWORK

Cards with custom artwork offer a way to stand out from the crowd and creatively express features of your institution or business. Display your company logo, showcase unique artwork, or convey a uniform message with custom artwork. How does it work? The process varies depending on whether this is a first-time purchase using your artwork or placing a repeat order.

United States

New, first-time artwork / Updating existing artwork:

1. Contact Inside Sales at CustomArtwork@allegion.com to begin your new custom artwork request or change request. Artwork file requirements will be provided.
2. Once you review the requirements, you can provide us with your compliant artwork file.
   a. Include a reference to CMYK in the art template, an .AI, .EPS, or .TIF file, a print scheme (see page 22), and credential encoding specifications for the first order.
   b. The Minimum Order Quantity (MOQ) on new custom artwork orders must be 1,000 or more. This applies to all first-time artwork orders and orders with updated artwork (including any changes to image, text, layout, or positioning).
3. A quote and artwork proof will be created and provided digitally for review and approval. Upon approval and signature, a new CA number will be assigned to your artwork file.
4. Each order will require the artwork proof to be re-confirmed in email to eliminate any miscommunication.
5. Upon request from Allegion, submit a completed purchase order to CustomArtwork@allegion.com. The PO must contain your new CA number and credential encoding specifications that were initially provided in the CA application Allegion will cross-check the encoding specs and will being producing your credentials.

Repeat artwork orders:

1. If you've purchased Custom Artwork credentials using the exact artwork template before, the MOQ is reduced to 500.
2. Contact Inside Sales at CustomArtwork@allegion.com to begin your repeat custom artwork order process.
3. Upon request from Allegion, submit a completed purchase order to CustomArtwork@allegion.com. The PO must contain your CA number and credential encoding specifications. Allegion will cross-check the encoding specs and will begin producing your credentials.

Notes:

- There is an extended lead time on all orders that begins when the Sales Order Acknowledgement is received (not when the order is submitted). Lead times may increase during periods of peak demand. It is recommended that orders be placed well ahead of the required need-by date.
- Custom artwork is available for all ISO glossy white and clamshell cards.
- The artwork design must fit within the space allotted.
- Physical samples can be provided with an extended lead time.
- Contact Inside Sales at CustomArtwork@allegion.com with any questions throughout the process.

PRINT SCHEME OPTIONS (PS#)

ID numbers are printed on the back of the cards. All the cards shown are picture samples for ID number locations only. Other variables on the card, such as logo and slot punch location are dependent on choices indicated on the Credential Order Form. Please indicate the print scheme option you would like on your purchase order. If a print scheme isn't selected, the default 01 print scheme will be provided.

CARDTRAX™ CREDENTIAL SEQUENCING SERVICE

Thank you for your interest in CardTrax,™ a credential order sequencing service designed for individual end users or integrator/OEMs to ensure card numbers are never duplicated.

There are two types of CardTrax accounts available:
Standard CardTrax™ and Restricted CardTrax.™

Standard CardTrax accounts are available for end users, PACS/OEM's and integrator customers. The account will track bit format, facility code, and badge ID information. It will not allow duplicates to be sent to that specific customer.

Restricted CardTrax accounts (bit formats 35C and 40X) are reserved for end users only. This type of account will track bit format facility code and badge ID information. The bit format and facility code combination can only be registered by one end user, and once registered it is not available to any other end user.

Purchases using a CardTrax account are limited to authorized vendors that are designated by the account manager of that account. To begin the application process, or to make changes to your existing CardTrax account, please contact your Allegion Sales Consultant or email CardTrax@Allegion.com requesting the latest version of the CardTrax application form.

Linking your CardTrax account to your SCEKS

End users with custom encryption keys (see page 20 for information on the Schlage Custom Encryption Key Service) can link their new or existing Custom Encryption ID number (CAxxxx) to a new or existing CardTrax account. After the link is complete, orders can be placed using just the respective CardTrax Account number (on the PO) and credentials will be both sequenced and encrypted with the end user's site-specific encryption during production.

Once a CardTrax account is linked to a custom encryption key, that CardTrax account will only produce credentials with custom encryption going forward. End user sites should plan accordingly to minimize the impact of an encryption key shift - including updating readers/electrified locks with new encryption and a replacement plan for old credentials. Contact your Allegion Sales Consultant for assistance navigating this change.

Linking your new custom encryption key to a CardTrax account is **highly recommended** to streamline credential purchases and purchaser authorization.

READERS OVERVIEW

With our versatile mobile enabled multi-technology, multi-technology, smart and proximity reader options, we have a solution for any physical access control need. Our comprehensive, yet simple reader line-up is suitable for any new mobile, smart or proximity installation.

Schlage Mobile Enabled Multi-technology readers (MTB Series)
Schlage mobile enabled multi-technology readers are ideal for any new mobile or smart installation—or as a cost-effective way to migrate from existing proximity to smart or mobile technology.

- 125 kHz proximity, 13.56 MHz smart and 2.4 GHz Bluetooth technology in one reader
- Compatible with Bluetooth and NFC-open smart phones
- Reads ISO 14443 A/B and 15693 credentials
- Compatible technologies include:
  - DESFire® CSN, HID iCLASS® CSN, Inside Contactless PicoTag® CSN, ST Microelectronics® CSN, Texas Instruments Tag-It® CSN, Phillips I-Code® CSN
  - Schlage® Proximity, HID® Proximity, GE/CASI® Proximity, AWID® Proximity, LenelProx®
  - Schlage MIFARE® DESFire® EV1 and EV3, Schlage MIFARE Classic®, Schlage MIFARE Plus®2
  - Schlage mobile credentials using NFC technology
- Wiegand, Clock & Data and RS-485 (OSDP, OSDP Secure) interfaces are standard
- Plug and Play mode for straight out of the box functionality
- Commission via ENGAGE™ mobile app for reader updates and easy configuration.
- Improved voltage range of 5V to 28V for simplified power management
- Tri-state LED (red, green, amber) and audible status alert
- Standard color is black. Cream is available as an option, longer lead times may apply.

Schlage Multi-technology readers (MT Series)
Schlage multi-technology readers are ideal for any new smart, proximity, or magnetic stripe installation—or as a cost effective way to migrate from existing magnetic stripe or proximity to smart technology.

- 125 kHz proximity and 13.56 MHz contactless smart card technology in one reader
- Magnetic stripe option, reads track 2 default, tracks 1 and 3 configurable
- Reads ISO 14443 A/B and 15693 credentials
- Compatible with:
  - Schlage MIFARE® DESFire® EV1 and EV3, Schlage MIFARE Classic®, Schlage MIFARE Plus®
  - Schlage mobile credentials using NFC technology
  - Most popular proximity credentials including Schlage, XceedID, HID®, GE/Casi ProxLite®, AWID®, and LenelProx®
  - CSN of most existing 13.56 MHz credentials
  - Magnetic stripe
- Wiegand interface (RS-485 available)
- FIPS 201-2 compliant
- Tri-state LED (red, green, amber) and audible status alert
- Standard color is black. Gray, brown and cream colors are available, longer lead times may apply.

Schlage Smart Readers (SM Series)
The Schlage smart mini-mullion reader is an excellent option for a smart-only installation.

- 13.56 MHz single frequency contactless smart card technology
- Reads ISO 14443 A/B and 15693 credentials
- Compatible with:
  - Schlage MIFARE® DESFire® EV1 and EV3, Schlage MIFARE Classic®, Schlage MIFARE Plus®

HOW TO ORDER

Follow the steps below to build the full part number for the reader you wish to order. Use the sample below to determine how to write your part number on your PO.

MOBILE ENABLED MULTI-TECHNOLOGY READERS

Example: MTB15 - ____ - __ - ____

1. Reader model number

   See page 34

2. Communication protocol

   Standard includes Wiegand, Clock & Data, RS-485 (OSDP, OSDP Secure)

3. Color option

   Black (standard) – leave blank
   Cream – add "C"

4. Custom Format or leave blank

MULTI-TECHNOLOGY READERS

Example: MTK15 - 485 - C - PIV8

1. Reader model number

   See page 27

2. Communication protocol

   Standard includes Wiegand, Clock & Data
   Optional: Specify "-485" (RS485, OSDP, Wiegand)

3. Color option

   Black (standard) – leave blank
   Cream – add "C"
   Warm-tone brown – add "BN"
   Cool-tone grey – add "G"

4. PIV or Custom Format or leave blank

   Optional; Specify PIV Format (see chart at right for formats)

SINGLE TECH READERS

Example: SM10 - ____ - G - ____

1. Reader model number

   See page 27

2. Communication protocol

   Standard includes Wiegand, Clock & Data

3. Color option

   Black (standard) – leave blank
   Cream – add "C"
   Warm-tone brown – add "BN"
   Cool-tone grey – add "G"

4. PIV format

   N/A

1. Choose your reader model

See next page for available models.

2. RS-485 capability

Schlage mobile enabled multi-technology readers (MTB Series) have been designed to interface directly with controllers that utilize RS-485 protocol as a standard feature. Schlage multi-technology readers (MT Series) have been designed with an option to interface directly with controllers that utilize RS-485 protocol. RS-485 is a communication protocol that allows a two way communication between the reader and the panel, for example OSDP protocol.

3. Reader color options

Schlage readers are available in four color options. Add the appropriate suffix after the reader model number for a cover color other than black. Please note the Schlage mobile enabled multi-technology readers (MTB Series) are only available in black and cream.

- Black (standard) – do not add a color suffix, **leave blank**
- Cream – **add "C"**
- Warm-tone brown – **add "BN"**
- Cool-tone grey – **add "G"**

4. PIV format

The Schlage multi-technology readers (MT Series) use 75-bit PIV as the default format. Other format requirements are determined by the access control system, agency requirements, and customer specifications. The other available formatting options are listed below. Add "PIV" and the format number after the reader model number, RS-485 option (if applicable), and color suffix (if applicable). PIV Formats are not available on the Schlage mobile enabled multi-technology readers (MTB Series).

FORMAT NUMBER	BIT INFORMATION
1	75-bit PIV
2	58-bit TWIC/CAC
3	200-bit FASC-N
4	64-bit (BCD) TWIC/CAC
5	83-bit TWIC/CAC
6	66-bit (58-bit format +TSM) TWIC/CAC
7	64-bit (58-bit format (no parity) + TSM) TWIC/CAC
8	91-bit (83 bit format + TSM) TWIC/CAC
9	40–bit BCD
10	40-bit reversed BCD
11	64-bit BCD
12	64-bit reversed BCD
13	128-bit BCD
14	128-bit reversed BCD
15	58-bit HSE

If you need assistance in determining the PIV format for your facility, please contact your Allegion sales representative directly.

5. Special Instructions

Please specify any other special instructions directly on your PO. Readers can be ordered from the factory with custom configurations. This service may add 4-8 days to shipping time. The same can be achieved by configuring in the field.

HOW TO ORDER

Follow the steps below.

1. Choose your reader controller model
Specify the desired Schlage RC Multi-technology reader controller (RC11, RC15, or RCK15).

2. Choose your pigtail cable and length
On a separate line item, specify the desired pigtail cable and pigtail length. A pigtail is required for installation and is not included with the RC model.

RC11

RC15

RCK15

Standard features

- Real time connectivity; local mode feature allows reader to function without a connection to the network
- Communication is secured using industry standard TLS 1.2 encryption
- Tamper detection via accelerometer senses any type of altering and prevents a security breach with the reader
- Three configurable inputs; Door Position (DPS), Request-to-Exit (REX), and Auxiliary (AUX)
- Reader controllers support 124 kHZ proximity, 13.56MHz smart technology, 2.4 GHz Bluetooth and Near Field Communication (NPC)
- Commission via ENGAGE™ mobile app for reader updates and easy configuration

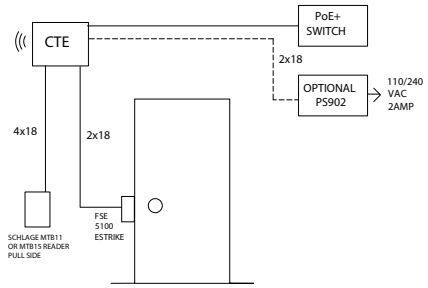
The CTE is an ENGAGE™ enabled single opening controller that allows perimeter and common area openings to be managed in a single system along with Schlage Control® smart deadbolts, NDEB cylindrical, and LEB mortise wireless locks. It is ideal for multi-family, commercial mixed use, and retail store front applications.

The CTE is designed to work with a Schlage® Mobile enabled multi-technology reader and interface with an electrified lock, electromagnetic lock, electric strike, automatic operator or exit device to control an opening.

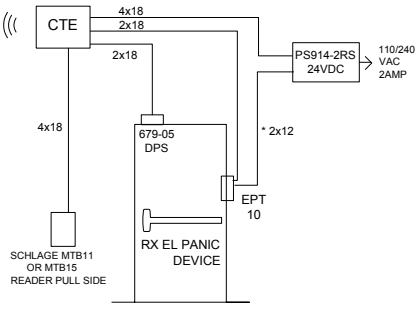
The CTE ENGAGE™ Single door controller with mobile enabled multi-technology reader kit can be used in a variety of applications; below are a few examples.
Please note: all components are sold separately.

ENGAGE™ cloud via mobile device or Wi-Fi, or Software Alliance Member (SAM) via Wi-Fi or GWE with IP to host



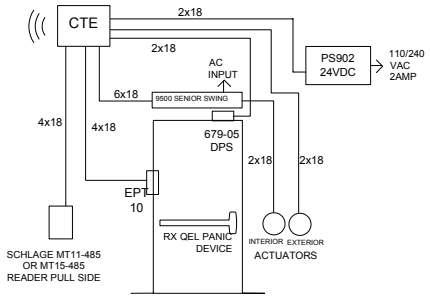
Operation: Presenting a valid credential to Schlage MTB XX reader will cause fail secure 5100 electric strike to release for authorized entrance. Free egress always.
Products: We offer a variety of electric strikes from Locknetics™ and Von Duprin®, as well as Schlage Power Supplies to meet the specific needs of the opening.

ENGAGE™ cloud via mobile device or Wi-Fi, or Software Alliance Member (SAM) via Wi-Fi or GWE with IP to host



Operation: Presenting a valid credential to Schlage MTB XX will cause EL panic device to retract for authorized entrance. Free non-alarmed egress at all times.
Products: We offer a variety of Falcon® and Von Duprin exit devices, and Von Duprin power supplies to meet the specific needs of the opening.

ENGAGE™ cloud via mobile device or Wi-Fi, or Software Alliance Member (SAM) via Wi-Fi or GWE with IP to host



Operation: Presenting a valid credential to Schlage MTB XX will cause QEL panic device to retract for authorized entrance and enable exterior actuator. Free non-alarmed egress at all times. Interior actuator always active to retract QEL panic and open door.
Products: We offer a variety of hardware and accessories from Von Duprin, LCN®, Schlage and Locknetics to meet the specific needs of the opening.

Certifications: UL 294 Indoor, FCC Part 15, NEMA Enclosure Indoor (Type 1, 4, and 4X), ULC S319 Indoor, RoHS

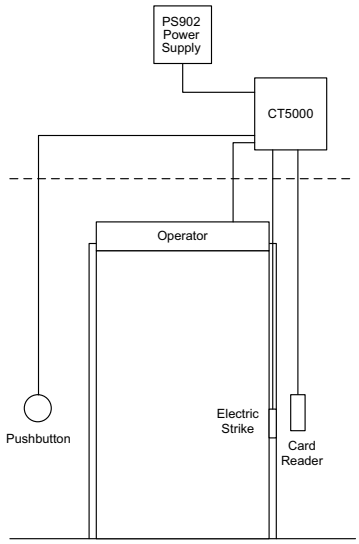
CT5000

The CT5000 is an indoor, offline single opening controller. It is flexible and works with various card reader technologies. With the correct power supply, the CT5000 controller works with various types of locking hardware, including electric strikes, electro-magnetic locks, or EL exit devices.

If networked functionality is required in the future, the CT5000 can be upgraded to a WRI-400 by upgrading the firmware and adding one incremental piece of hardware. This provides greater adaptability in the field.

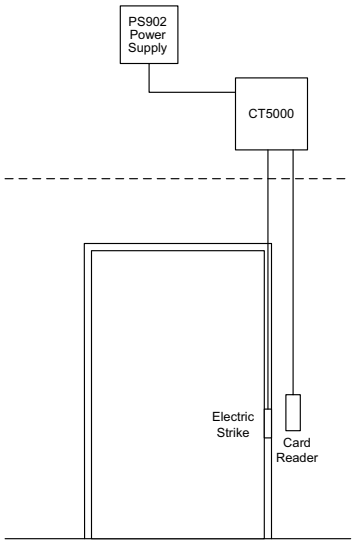
Perimeter Door Application

The CT5000 can be used for perimeter door applications with an automatic operator, electric strike and card reader



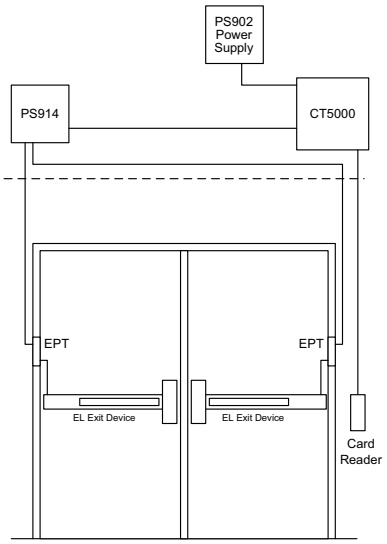
Narrow Stile Application

For narrow stile applications the CT5000 can be used with an electric strike and card reader



Panic Device Application

The CT5000 and a card reader along with the Von Duprin 914 Power Supply can control two EL exit devices for double door applications



Note: All hardware shown above including exit devices, electric strikes, auto operators, power supplies, push buttons, etc. are sold separately.

Certifications

- UL 294
- Canada UL
- FCC Part 15
- Canada RSS – 210
- RoHS

Features

- Supports up to 5000 users and audits
- Comes standard with 15 foot USB remote cable connector
- Programmed using Schlage Handheld Device (HHD) via USB connection or with SUS A-KIT and Schlage Utility Software Android™ app
- Power is hardwired
- Three form C relay outputs (for strike, auxiliary, and alarm)
- Supports Request-to-Exit (remote release) and Door Position Switch input.
- Card functions supported: normal, toggle, freeze, pass through, construction, lock down, and all card plus PIN applications
- Multiple reader technologies and positions on both sides of the gate/ door
- Internal LED visual indicators (Including low battery and state of the relay)
- Compatible with Schlage Express

Credential compatibility

- Magnetic stripe: field configurable track 1, 2, or 3
- Compatible with Schlage, Xceed ID™, AWID®, HID®, GE/CASI ProxLite®
- 125 kHz Proximity cards: 26a, 34x, 35x, 37x bit formats (reader dependant)
- 13.56 MHz Smart card: 26a,34x, 35x, 37x, 40x, 48x bit format (reader dependant)
- Can read card serial number of Mifare DESfire (reader dependant)

The following readers are UL294 listed for use with the CT5000:

- Essex Electronics model KTP-162
- Mercury Security models MR-5 and MR-20
- Schlage (previously XceedID) models PR10, SM10, MT11, MT15, MTK15

NDE LOCK

You can **configure and price a full range of products** using the tables and rules shown in this section.

The pricing of locks in this section includes the P6 cylinder in an open keyway (where applicable), default latch, strike, and a 1-3/4" thick door. Additional modifications are available using the rules and price adjustments on the subsequent pages.

How to order:

- All applicable product attributes must be provided in the order shown below
- Each value must separated by a period
- If requesting a product "Less (LLL)" any attribute, the entire detailed ACN must be provided
- Fractions will be written with the "/" symbol separating the numerator and the denominator (example 1/2)
- For dimensions that contain a whole number and a fraction, a hyphen "-" will be added after the whole number and before the fraction (example 2-1/4)
- For two dimensions represented together, such as length and width, the values would be separated by an "x" with no spaces
- Finishes should be listed using their BHMA finish as shown in this book

Common pricing information

1.	Locks are furnished with standard features unless otherwise specified.
2.	Door thickness is 1-3/4".
3.	Split finishes and designs will be priced at the highest list price of the design and/or finish.
4.	Engineering specials are denoted by a part number beginning with "X" and are not subject to standard discounting.
5.	⌛ denotes a lock or part that requires an extended lead time.
6.	For all restricted keyways (Everest B, D, 29R, and 29T, also Quad, Numbered, and Reversed) add $30.00. This does not apply to Primus cylinders. See page 4 for ordering information and requirements.
7.	Locks, keys, and cylinders containing restricted keyways require additional documentation to order. Please see page 4 for the specific requirements.
8.	Keyway must be specified for keyed functions and cylinders. If not specified, default keyway will be S123 for KA, KD, and 0-bitted product and S145 for Factory managed masterkey systems.
9.	Multiple keying options are available. Locks and cylinders are furnished KD unless otherwise specified or excepted by notation.
10.	Control Keys for permanent and construction cores are not included with the lock or cylinder and must be ordered separately.
11.	Locks specified with "C" keyway and KD or 0-bitted will receive 6-pin cylinders (keyed 5) with 5 pin keys.
12.	Full Size Interchangeable Cores (FSIC) are furnished 1-bitted unless otherwise specified. If 0-bitted is selected, the order will be entered as 1-bitted. This does not apply to FSIC Primus® cores.
13.	Conventional cylinders, Primus cylinders (conventional and FSIC) can be supplied 0-bitted. If 1-bitted is selected, the order will be entered as 0-bitted.
14.	Available plug face finishes are 606, 622, 626, and 643e.

NDEB AND NDEBSI - INTERIOR PUSH BUTTON (FUNCTION SELECTABLE VIA ENGAGE™ MOBILE APP)	
Storeroom/ Classroom	Lockset is normally secure with outside lever disengaged. Valid normal credential or key momentarily unlocks door. Valid toggle credential may be used to change to a passage or secured state. Interior push button on inside housing confirms state of the lock via LED indicator. A mechanical key will retract the latch. Inside lever always allows free egress.
Office	Lockset is normally secure with outside lever disengaged. Valid normal credential or key momentarily unlocks door. Valid toggle credential may be used to change to a passage or secured state. Interior push button on inside housing can be used to select a passage or secured state and confirms state of the lock via LED indicator. A mechanical key will retract the latch. Inside lever always allows free egress. Meets the need for lockdown function for safety and security.
Privacy	Lockset is normally secure with outside lever disengaged. Valid normal credential or key momentarily unlocks door. Valid toggle credential may be used to change to a passage or secured state. Interior pushbutton on inside housing may be used to select a privacy status. The interior pushbutton will disable normal electronic access from the exterior and confirms state of the lock via LED indicator. Opening the door or pressing the interior pushbutton a second time on the inside housing deactivates the privacy status. A mechanical key will always retract the latch. Inside lever always allows free egress. Door position sensor required for function.
Apartment	Lockset is normally secure with outside lever disengaged. Valid normal or toggle credential is used to change to a passage or secured state. Interior pushbutton on inside housing may be used to select a passage or secured state and confirms state of the lock via LED indicator. Opening the door or pressing the interior pushbutton a second time causes the lockset to toggle to passage. While in passage mode, the lockset can only be secured while the door is closed by pressing the interior pushbutton or using a normal credential on the exterior. A mechanical key will retract the latch. Inside lever always allows free egress. Door position sensor required for function.

You can **configure and price a full range of products** using the tables and rules shown in this section.

The pricing of locks in this section includes the P6 cylinder in an open keyway (where applicable), default latch, strike, and a 1-3/4" thick door. Additional modifications are available using the rules and price adjustments on the subsequent pages.

How to order:

- All applicable product attributes must be provided in the order shown below
- Each value must separated by a period
- If requesting a product "Less (LLL)" any attribute, the entire detailed ACN must be provided
- Fractions will be written with the "/" symbol separating the numerator and the denominator (example 1/2)
- For dimensions that contain a whole number and a fraction, a hyphen "-" will be added after the whole number and before the fraction (example 2-1/4)
- For two dimensions represented together, such as length and width, the values would be separated by an "x" with no spaces
- Finishes should be listed using their BHMA finish as shown in this book

AD SERIES NETWORKED LOCKS

- With the AD Series, one platform translates to an endless number of adaptable solutions. You can choose the features and functions that are right for the application today, and upgrade to meet your evolving needs in the future.

CLASS		
AD-300	Networked/Hardwired; Direct RS-485 connection or Wiegand or Clock & Data	
AD-302	FIPS 201-2 Compliant, Networked Hardwired; Direct RS-485 connection or Wiegand or Clock & Data	
AD-400	Networked/Wireless; 900 MHz, Secure encrypted data transmission	
AD-402	FIPS 201-2 Compliant, Networked Wireless; 900 MHz, Secure encrypted data transmission	

1. AD-Series locks are upgradable from standalone to networked by applying a communication module available in the accessories section and new firmware available on www.schlage.com/support.

CHASSIS		
CY: Cylindrical	Bored lock installed into round hole in the door	
MS: Mortise	Lock case installed into a mortise rectangular "pocket" in the door	
MD: Mortise Deadbolt	Mortise lock with built-in interconnected auxiliary deadbolt	
993R: Exit Trim	Rim/Concealed Vertical Rod* (CVR) & Concealed Vertical Cable* (CVC) * Metal door only	
993M: Exit Trim	Mortise	
993S: Exit Trim	Surface Vertical Rod (SVR)	
993DT: Exit Trim	Non-Functioning "Dummy" Exit Trim	

2. Mortise Deadbolt requires RS-485 connection to the ACP, see pages 99–100 for system diagram. Check with access control software provider to verify function is enabled.
3. Exit trim utilizes universal hardware to simplify installation to a variety of exit device. AD Series networked locks require a Request-to-Exit switch, please see compatibility chart below.

   - Part number for Falcon AE switch: 650359
5. Metal door only.

FUNCTIONS		AD-300/302	AD-400/402
70: Storeroom	Lockset is normally secure. Inside lever always allows free egress. Valid toggle credentials on the exterior may be used to change to a passage or secured status.		50: Office/ Classroom	Lockset is normally secure. Inside lever always allows free egress. Interior pushbutton on inside housing may be used to select a passage or secured status. Meets need for lockdown function for safety and security. NOTE: Valid toggle credentials on the exterior may also be used to change status. Has interior pushbutton (IPB).		
40: Privacy	Lockset is normally secure. Inside lever always allows free egress. Interior pushbutton on inside housing may be used to select a privacy status. The interior pushbutton will disable normal electronic access from the exterior. Opening the door or pressing the interior pushbutton a second time on the inside housing deactivates the privacy status. Has interior pushbutton (IPB).		60: Apartment	Lockset is normally secure. Inside lever always allows free egress. Interior pushbutton on inside housing may be used to select a passage or secured status. Opening the door or pressing the interior pushbutton causes the lockset to toggle unsecured. While toggled unsecured, the lockset can only be secured while the door is closed by pressing the interior pushbutton or using a normal credential on the exterior. Normal electronic access from the exterior is always allowed. Has interior pushbutton.

You can **configure and price a full range of products** using the tables and rules shown in this section.

The pricing of locks in this section includes the P6 cylinder in an open keyway (where applicable), default latch, strike and a 1-3/4" thick door. Additional modifications are available using the rules and price adjustments on the subsequent pages.

How to order:

- All applicable product attributes must be provided in the order shown below
- Each value must separated by a period
- If requesting a product "Less (LLL)" any attribute, the entire detailed ACN must be provided
- Fractions will be written with the "/" symbol separating the numerator and the denominator (example 1/2)
- For dimensions that contain a whole number and a fraction, a hyphen "-" will be added after the whole number and before the fraction (example 2-1/4)
- For two dimensions represented together, such as length and width, the values would be separated by an "x" with no spaces
- Finishes should be listed using their BHMA finish as shown in this book

DOOR DIMENSIONS

- Specify door thickness on order only if different than 1-3/4" thick door
- Door thickness should be specified to the nearest 1/8"

DOOR THICKNESS	
1-3/4"	1-3/4"
1-3/8"	1-3/8" to 2-3/4", Shims included (Specify in 1/8" increments)

1. Door thickness kits are available on page 194 to install a lock on a door that is thicker or thinner than 1-3/4". See AD Series Parts Guide for details. Locks cannot be installed on doors thicker than 2-3/4" or thinner than 1-3/8".
2. Thin door shims are available on page 194 to install a lock on a door that is thinner than 1-3/4".
3. Decorative plates are used to cover exposed holes when retrofitting from existing locks to AD Series locks. The size of plate required will vary based on the size and location of holes being covered. Retrofit information can be found at www.schlage.com/support.
4. If under the lock decorative plates are on both sides of device, then door will become 1/8" thicker. A door thickness kit of an incremental 1/8" must be ordered to accommodate under the lock plates.

SYSTEM ARCHITECTURE FOR AD-300 AND AD-400

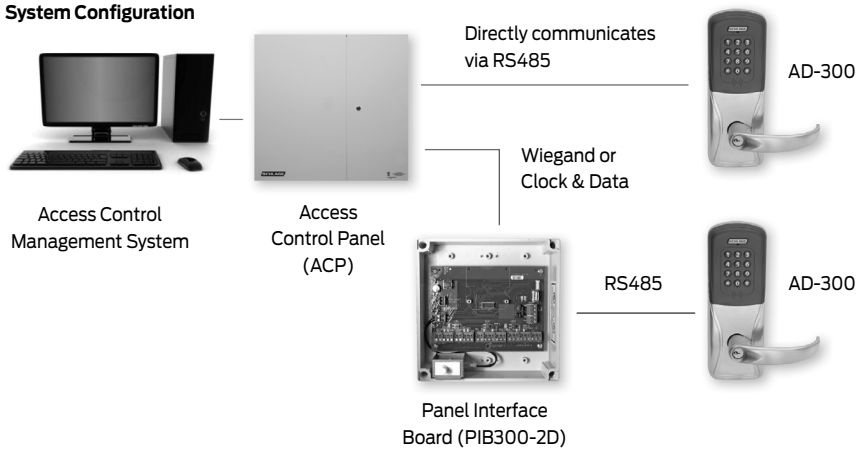
The AD Series combines all the hardware components required at the door for a complete access control system into one integrated design to simplify installation. This includes the electrified lock, credential reader, request-to-exit and -enter sensors, door position switch, tamper guard and more.

The AD Series is available with flexible hardwired and wireless networked options and can accommodate Wiegand, Clock & Data or RS485 connections to the access control panel or reader interface board.

The following system configurations should be utilized as a guideline for specifying the AD Series. Data sheets with technical specifications are available for download on www.schlage.com/support. We suggest that you consult with your Access Control Provider to verify the specific features, functions and capabilities of the AD Series.

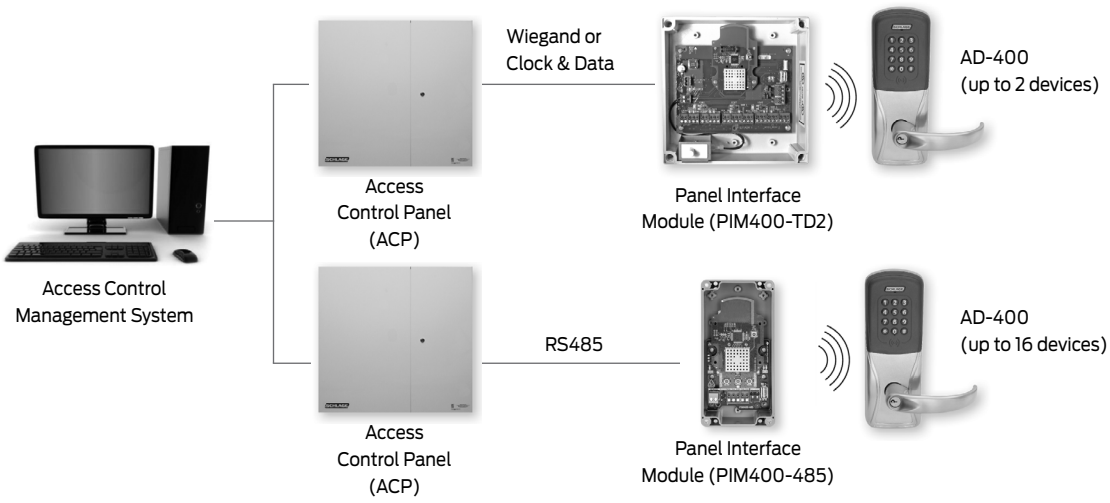
AD-300 NETWORKED HARDWIRED SOLUTION

- Connections other than Wiegand or Clock & Data may incur an additional fee. Consult access control software provides for details.
- PIB300-2D required for Wiegand or Clock & Data connection; supports up to 2 AD-300 devices.



AD-400 NETWORKED WIRELESS SOLUTION

- Connections other than Wiegand or Clock & Data may incur an additional fee. Consult access control software provides for details.
- PIM400-TD2 required for Wiegand or Clock & Data connection; supports up to 2 AD-400 devices.
- If RS485 connection to other ACP is required, contact software provider.



SYSTEM ARCHITECTURE FOR AD-302 AND AD-402

FIPS 201 Overview

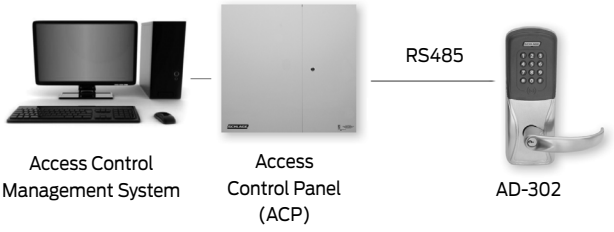
- Federal Government Standard for secure and reliable form of identification
- Mandated by Homeland Security Presidential Directive 12 (HSPD 12)
- Required for all Federal Government employees and contractors
- Mandates the type of Smart Card and Card Reader per application
- The WPR401 (wireless portable reader) is available for remote credential verification

In order to meet requirements, the AD Series can either be:

1. Sold as a complete unit with the FMK Multi-technology + keypad reader
2. Field upgraded to a FIPS 201-2 compliant solution by adding the FMK reader (sold separately) and by utilizing the most current firmware available.

AD-302 HARDWIRED FIPS 201-2 COMPLIANT SOLUTION

- RS-485 or Wiegand communication to access control panel (ACP must be FIPS 201-2 compliant)
- FIPS 201-2 Multi-technology reader (FMK)



AD-402 WIRELESS FIPS 201-2 COMPLIANT SOLUTION

- 900 MHz communication between lock and PIM400-TD2
- FIPS Multi-technology reader (FMK)
- Connections other than Wiegand or Clock & Data may incur an additional fee. Consult access control software provider for details
- If RS485 connection to ACP is required, contact software provider

FUNCTIONS		AD-200/201	AD-250
70: Storeroom	Lockset is normally secure. Inside lever always allows free egress. Valid toggle credentials on the exterior may be used to change to a passage or secured status.		
50: Office/ Classroom	Lockset is normally secure. Inside lever always allows free egress. Interior pushbutton on inside housing may be used to select a passage or secured status. Meets need for lockdown function for safety and security. NOTE: Valid toggle credentials on the exterior may also be used to change status. Has interior pushbutton (IPB).		
40: Privacy	Lockset is normally secure. Inside lever always allows free egress. Interior pushbutton on inside housing may be used to select a privacy status. The interior pushbutton will disable normal electronic access from the exterior. Opening the door or pressing the interior pushbutton a second time on the inside housing deactivates the privacy status. Has interior pushbutton (IPB).		
60: Apartment	Lockset is normally secure. Inside lever always allows free egress. Interior-pushbutton on inside housing may be used to select a passage or secured status. Opening the door or pressing the interior pushbutton causes the lockset to toggle unsecured. While toggled unsecured, the lockset can only be secured while the door is closed by pressing the interior pushbutton or using a normal credential on the exterior. Normal electronic access from the exterior is always allowed. Has interior pushbutton.

DOOR DIMENSIONS

DOOR THICKNESS

- Specify door thickness on order only if different than 1-3/4" thick door
- Door thickness should be specified to the nearest 1/8"

DOOR THICKNESS	
1-3/4"	1-3/4"
1-3/8"	1-3/8" to 2-3/4", Shims included (Specify in 1/8" increments)

1. Door thickness kits are available on page 194 to install a lock on a door that is thicker or thinner than 1-3/4". See AD Series Parts Guide for details. Locks cannot be installed on doors thicker than 2-3/4" or thinner than 1-3/8".
2. Thin door shims are available on page 194 to install a lock on a door that is thinner than 1-3/4".
3. Decorative plates are used to cover exposed holes when retrofitting from existing locks to AD Series locks. The size of plate required will vary based on the size and location of holes being covered. Retrofit information can be found at www.schlage.com/support.
4. If under the lock decorative plates are on both sides of device, then door will become 1/8" thicker. A door thickness kit of an incremental 1/8" must be ordered to accommodate under the lock plates.

FUNCTIONS		CO-100	CO-200/CO-250
70: Storeroom	Lockset is normally secure. Inside lever always allows free egress. Valid toggle credentials on the exterior may be used to change to a passage or secured status.		
50: Office/ Classroom	Lockset is normally secure. Inside lever always allows free egress. Interior pushbutton on inside housing may be used to select a passage or secured status. Meets need for lockdown function for safety and security. NOTE: Valid toggle credentials on the exterior may also be used to change status. Has interior pushbutton (IPB).		40: Privacy	Lockset is normally secure. Inside lever always allows free egress. Interior pushbutton on inside housing may be used to select a privacy status. The interior pushbutton will disable normal electronic access from the exterior. Opening the door or pressing the interior pushbutton a second time on the inside housing deactivates the privacy status. Has interior pushbutton (IPB).		

		CO-220
75: Classroom Security	Operates like a standard Storeroom (70) function. When remote fob is pressed to initiate immediate local lockdown, all normal credentials are rejected and only an authorized pass through credential will allow access. Inside lever always allows free egress.	
READER

KP: Keypad	12 button design	
MS: Magnetic Stripe (Swipe)	Configurable to read the complete Track 1, 2 or 3.	
MSK: Magnetic Stripe + Keypad (Swipe)	Configurable to read the complete Track 1, 2 or 3.	
PR: Proximity	Reads 125 kHz proximity credentials	
PRK: Proximity + Keypad	Reads 125 kHz proximity credentials	

Please refer to CO Series data sheets and solution sheets prior to ordering to verify credential compatibility.

How to order:

- All applicable product attributes must be provided in the order shown below
- Each value must separated by a period
- If requesting a product "Less (LLL)" any attribute, the entire detailed ACN must be provided
- Fractions will be written with the "/" symbol separating the numerator and the denominator (example 1/2)
- For dimensions that contain a whole number and a fraction, a hyphen "-" will be added after the whole number and before the fraction (example 2-1/4)
- For two dimensions represented together, such as length and width, the values would be separated by an "x" with no spaces
- Finishes should be listed using their BHMA finish as shown in this book

COMPLETE LOCKS DOOR DIMENSIONS

- Specify door thickness on order only if different than 1-3/4" thick door
- Door thickness should be specified to the nearest 1/8"

DOOR THICKNESS	
1-3/4"	1-3/4"
1-3/8"	1-3/8" to 2-3/4", Shims included (Specify in 1/8" increments)

1. Door thickness kits are available on page 256 to install a lock on a door that is thicker or thinner than 1-3/4". See AD Series Parts Guide for details. Locks cannot be installed on doors thicker than 2-3/4" or thinner than 1-3/8".
2. Thin door shims are available on page 256 to install a lock on a door that is thinner than 1-3/4".
3. Decorative plates are used to cover exposed holes when retrofitting from existing locks to AD Series locks. The size of plate required will vary based on the size and location of holes being covered. Retrofit information can be found at www.schlage.com/support.
4. If under the lock decorative plates are on both sides of device, then door will become 1/8" thicker. A door thickness kit of an incremental 1/8" must be ordered to accommodate under the lock plates.

CT5000 OFFLINE CONTROLLER

OVERVIEW

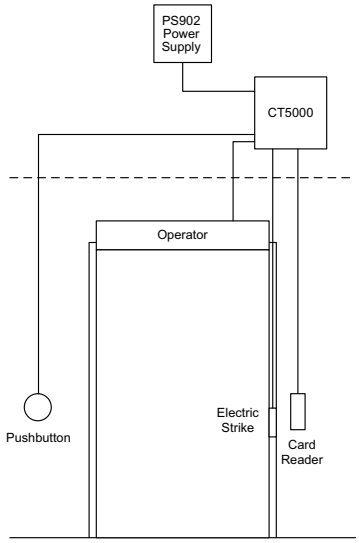
CT5000

The CT5000 is an indoor, offline single opening controller. It is flexible and works with various card reader technologies. With the correct power supply, the CT5000 controller works with various types of locking hardware, including electric strikes, electro-magnetic locks, or EL exit devices.

If networked functionality is required in the future, the CT5000 can be upgraded to a WRI-400 by upgrading the firmware and adding one incremental piece of hardware. This provides greater adaptability in the field.

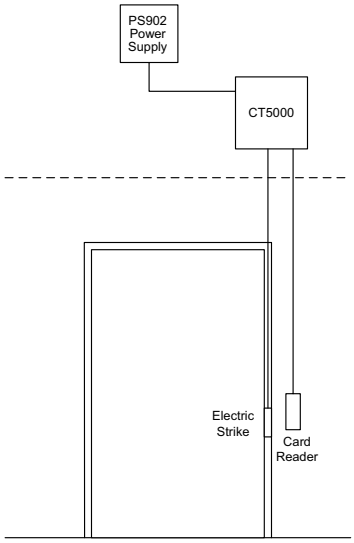
Perimeter Door Application

The CT5000 can be used for perimeter door applications with an automatic operator, electric strike and card reader



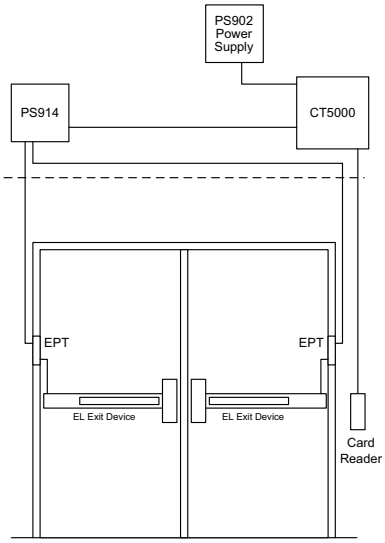
Narrow Stile Application

For narrow stile applications the CT5000 can be used with an electric strike and card reader



Panic Device Application

The CT5000 and a card reader along with the Von Duprin 914 Power Supply can control two EL exit devices for double door applications



Note: All hardware shown above including exit devices, electric strikes, auto operators, power supplies, push buttons, etc. are sold separately.

Certifications

- UL 294
- Canada UL
- FCC Part 15
- Canada RSS – 210
- RoHS

CT5000 OFFLINE CONTROLLER FEATURES

Features
- Supports up to 5000 users and audits
- Comes standard with 15 foot USB remote cable connector
- Programmed using Schlage Handheld Device (HHD) via USB connection or with SUS A-KIT and Schlage Utility Software Android™ app
- Power is hardwired
- Three form C relay outputs (for strike, auxiliary, and alarm)
- Supports Request-to-Exit (remote release) and Door Position Switch input.
- Card functions supported: normal, toggle, freeze, pass through, construction, lock down, and all card plus PIN applications

M490DE DELAYED EGRESS SERIES

with Limited Lifetime Warranty on Magnetic Coil Assembly

Patent #'s 6,053,546/5,479,151/5,133,581

Standard features

- Delayed egress with plunger switch & external switch input
- Designed to meet NFPA 101 Life Safety Code
- Automatic voltage selection
- UL294 Special locking arrangement including BOCA[1]
- ANSI/BHMA 156.24
- UL 10C listed; cUL
- CSFM California State Fire Marshal listed
- Authorized release input
- On-board audible alarm
- On-board bi-color LED
- Fire alarm terminals

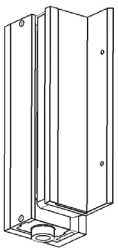
M490G GATE LOCK

with Limited Lifetime Warranty on Magnetic Coil Assembly

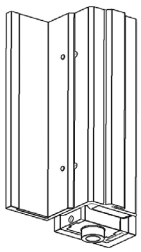
Patent # 4,957,316

Standard features

- Includes - universal mounting brackets - for swinging or sliding gate
- Special corrosion-resistant finish
- 1/2" EMT compression fitting
- Built in voltage spike suppression
- Door Status Monitor
- Magnetic Bond Sensor
- ANSI/BHMA 156.23. Outdoor Rated - Certified for use -31° to 151° F (-35° to 66° C)



Sliding Gate



Swinging Gate

Note: Brackets for both applications included.

SPECIFICATIONS	M490G

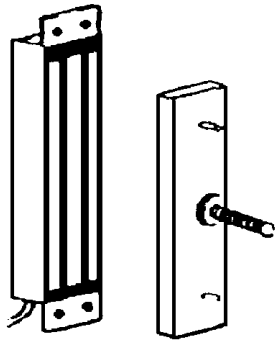
320M MINILINE MAGNET LOCK

with Limited Lifetime Warranty on Magnetic Coil Assembly

Standard features

- Mortise mount for sliding doors
- Includes mounting tabs and armature mounting block
- Door Status Monitor and Magnetic Bond Sensor
- Adjustable relocking delay
- UL 10C listed; cUL
- CSFM California State Fire Marshal listed



Note: For Wood Frames: Due to higher ambient operating temperatures, it is REQUIRED that the 12 VDC configuration be used.

GF3000 SHEAR LOCK MORTISE SERIES

with Limited Lifetime Warranty on Magnetic Coil Assembly

Patent # 6,611,414

Standard features

- Microprocessor controlled
- Built-in Auto Relocking Switch (ARS)
- Jump 1/4" gap - no in-rush current (noticeable noise level when connecting)
- Automatic voltage selection 12 VDC or 24 VDC
- Cool temperature regulator
- Adjustable time delay: 2-30 sec. from face of magnet
- ANSI/BHMA 156.23
- UL 10C listed; cUL
- CSFM California State Fire Marshal listed

SPECIFICATIONS

Holding force	3000 lbs
Current draw	0.90A @ 12 VDC 0.45A @ 24 VDC
Lock size	9-1/2" L x 1-1/2" W x 1-1/2" H
Weight (approximate)	7 lbs

GF3000 SHEAR LOCK SURFACE SERIES

with Limited Lifetime Warranty on Magnetic Coil Assembly

Patent # 6,611,414

Standard features

- Microprocessor controlled
- Built-in Auto Relocking Switch (ARS)
- Jump 1/4" gap - no in-rush current (noticeable noise when connecting)
- Automatic voltage selection 12 VDC or 24 VDC
- Cool temperature regulator
- Adjustable time delay, 2-30 sec. from face of magnet
- Satin black, anodized housing (not available in special finishes)
- ANSI/BHMA 156.23
- UL 10C listed; cUL
- CSFM California State Fire Marshal listed

DELAYED EXIT SYSTEM

See Von Duprin Exit Hardware and Parts price book

DE5300 SERIES	
Application	▪ Designed to meet NFPA 101 "Special Locking Arrangement" applications ▪ Ideal for controlled areas ▪ Addresses life safety and security needs ▪ Commonly used on narrow stile doors where a standard narrow stile Chexit is not practical

ELECTRIC POWER TRANSFER

See Von Duprin Exit Hardware and Parts price book

EPT	
Application	▪ Provide a means for transferring electrical power from a door frame to the edge of a swinging door ▪ Units are completely concealed when the door is in the closed position ▪ Ideally suited for applications involving abuse or heavy traffic
Popular models	▪ EPT-2: Two 18 gauge wires; Up to 2 amps @ 24VDC, with a 16 AMP maximum surge ▪ EPT-10: Ten 24 gauge wires; Up to 1 amp @ 24VDC, with a 16 AMP maximum surge

672 TOUCHBAR

Patent Issued

The 672 TouchBar is a request-to-exit device used to release electromagnetic locks. Designed for easy installation, smooth operation, and maximum durability.

Standard features

- Pushpad with "PUSH TO EXIT" signage
- 1/4" Movement to activate switch
- Heavy-duty aluminum extrusion and powder coated zinc end caps
- Double pole, double throw switch
- UL 294 listed for access control system
- Universal mounting system for aluminum, hollow metal and wood doors (Includes self-drilling, self-tapping screws for aluminum or wood door application: RIV nuts for hollow metal door applications)
- Field reversible

Specifications

Mechanical

- Available in standard lengths to fit 36", 42" and 48" doors
- Can also be field cut at the installation site for custom lengths

Electrical

- Switch: DPDT contacts rated 4A @ 30 VDC
- Wiring: 6 Conductor Cable - 20 AWG (standard)

692 SMARTBAR

Patent Issued

The 692 TouchBar is a request-to-exit device with no moving parts used to release electromagnetic locks. Designed for easy installation, smooth operation and maximum durability.

Standard features

- Push pad with "PUSH TO EXIT" signage
- Touch any point on the pushpad to release locking device
- Audible alarm
- Heavy duty aluminum extrusion and powder coated zinc end caps
- Directionally opposed infrared detection circuits
- DPDT relay
- Universal mounting system for aluminum, hollow metal and wood doors (Includes self-drilling, self-tapping screws for aluminum or wood door application: RIV nuts for hollow metal door applications)
- 798-18, 18" x 1/2" Armored door cord (798-18) shipped standard
- UL 294 listed for access control system

RE: District 10, Jones Elementary School ← ***Facility Name - REQUIRED***

Please consider this authorization to ship product for the above-referenced project.

Jones Elementary School is to be keyed using a new Everest 29 T Restricted Key System. For security reasons, we would like to have all keys for this facility shipped to a location other than the job site. Master keyed products, however, can be shipped directly to the site. This letter authorizes Schlage to ship our restricted products to the following addresses:

Master Keyed Products, Construction Keys, Locks Less Cylinders, and Locks with Construction Cores

A library of common wiring diagrams are available at no-charge for use in single and double door applications utilizing various configurations of Allegion door hardware products. These diagrams can be accessed through our Knowledge Center tool at http://kc.allegion.com/

Click on Common Wiring Diagrams located under the column Top Solutions.

CUSTOM WIRING DIAGRAMS

When common wiring diagrams do not meet the needs of the job requirements, Allegion offers a service to purchase custom wiring diagrams. All custom wiring diagrams include a point-to-point with theory of operation and a riser diagram. Custom wiring diagrams fall into two categories: Standard and Complex.

- **Standard drawings**: All Allegion products with a single opening and a basic theory of operation. These drawings are quoted on a per drawing basis.
- **Complex drawings**: Generic contacts, 3rd party components, complex relay logic, timer circuit logic, any other additional advanced logic. These drawings must be processed through a quote process to determine the total NET cost of the request.

How does the Custom Wiring Diagram Request Process work?

- Custom wiring diagrams can only be ordered by and shipped to current Allegion Channel Partners.
- For United States, Wiring Diagram Request Forms can be obtained by:
  - Sending an email request to Wiring.Diagram.Request@allegion.com
  - Using the form located on page 304
- For Canada, Wiring Diagram Request Forms can be obtained by:
  - Sending an email request to Canada.TechServices@allegion.com
  - Using the form located on page 305
- For United States, email the completed request form to Wiring.Diagram.Request@allegion.com. For Canada, please email the completed request form to Canada.TechServices@allegion.com.
- Be sure and include the following information to prevent delays to the request:
  - All supporting documentation for non-Allegion products
  - Hardware list with complete part numbers
  - Detailed theory of operation for all openings
- Upon receipt, the custom wiring coordinator will review and clarify the request as needed.
- Once all clarifications are resolved, a QUOTE#, NET pricing, and lead time will be assigned and communicated to the requester within one business day.
- Drawings that fall under a Standard type will be quoted a NET $300.00 for each drawing.
- Drawings that fall under a Complex type will receive a NET quote depending on the time required to complete the drawings at an hourly rate of $300.00/hour.
- A purchase order with the QUOTE# must be received for the wiring diagrams to be produced.
  - For United States, send the completed PO to Wiring.Diagram.Request@allegion.com
  - For Canada, send the completed PO to Canada.TechServices@allegion.com
- Lead time is generally 2-3 weeks from time PO is received, more complex requests will have longer lead times.
- Changes to the original request after a quote approval may incur additional charges and affect lead time.
- QUOTE# is valid for 90 days.
- Custom wiring diagrams, once completed, will be emailed to the requester.
