You can **configure and price a full range of products** using the tables and rules shown in this book.

The simplified structure of pricing and product data in this book creates an easier configuration experience and a quicker update process for future price increases. Pricing logic used in this format makes the product and price easier to understand and has enabled Allegion to provide customers with a **digital data set of pricing, available for download at <http://360portal.allegion.com>**.

As a result, the **How to Order formats have been updated to match the Allegion Catalog Nomenclature (ACN) logic**. ACNs are descriptive, unique identifiers that set standards on how to order products and require default, consistent naming conventions for all product attributes across Allegion brands.

Standard Products

In each tabbed section of this Price Book you will find a comprehensive listing of our current offering per product series. Products should be ordered via the traditional method by designating the product, design, finish, handing, and options for each line item (refer to “How to Order” in the Forms & Examples section of the price book). All orders will be processed based on normal factory lead times. These lead times vary throughout the year and are affected by production volumes, supplier schedules and quantity demands. An anticipated ship date will be included with each order acknowledgment.

Some of the products listed in these sections require extended lead times. You will find the hourglass symbol (⌚) associated with products that require extended lead times so that you are aware of this condition prior to placing your order. Products included in this classification are those items that represent a unique combination of product attributes (i.e. finish, trim, function, etc.) that typically require additional manufacturing care and attention. Products marked “⌚” will routinely exceed normal factory lead times and anticipated ship dates will be indicated with each order acknowledgment.

INDICATORS

As of April 1st we began manufacturing the new ND Series Indication trims. As a new offering there is no impact to existing product listings or prices shown in Price Book 14 which also went into effect March 1. The new lock status indication trim is radically different than any cylindrical trim in the marketplace and offers many benefits for your customers:

- Can be ordered configured or as a retrofit kit
- Window size is unmatched in the market using an escutcheon style trim to allow the message to run the full width of the lock at a height of .6" for maximum visibility
- It can be installed using the same standard door prep as any ND Series lock
- Trim is available on eight functions, one-sided only (ordered handed)
- Fits 1-3/4" doors
- Sold separate spacer plates increase door range to include 1-3/8" to 1-11/16" doors

AVAILABLE ON THESE FUNCTIONS:	
Classroom and other uses (Inside Only)	Privacy (Outside Only)
- ND50 - ND91 - ND53 - ND92 - ND78 - ND98	- ND40 - ND44

Vandlgard® feature helps protect the lock chassis from damage. The Vandlgard optional feature available on many functions allows the outside lever to rotate freely down when in a locked state. This limits the ability of vandals to apply excessive force to the lever helping to prevent damage to internal components.

ELECTROMECHANICAL FUNCTIONS

All locks feature automatic detection and operation with 12 or 24V DC (**Motorized Latch Retraction is 24V DC only**), and a case-mounted switch that allows customer selection of EL (fail safe - power failure allows either knob/lever to retract latchbolt and/or deadbolt) or EU (fail secure - power failure locks outside knob/lever or both knobs/levers). Please specify lock function as EL or EU for default switch position.

Locks also come standard with Allegion Connect Molex connector with 3" lead and CON-6W. Allegion Connect is a Molex connector system that allows rapid installation of locks when used with Allegion Connect Harnesses (see page 201) and Allegion Connect Hinges (see Ives price book). Indicators are not allowed on electrified locks. For more information speak with your sales representative. The Molex connector can also be cut off so that the lock can be installed with traditional splicing. UL 294 Access Control Performance Levels: Destructive Attack, Level 1; Line Security, Level 1; Standby Power, Level 1; Endurance, Level IV (with DM, or LX, Endurance, Level I).

Available options for electrified functions:

- Request-to-Exit (RX)
- Latchbolt monitor (LX)
- Door position sensor (DPS) (non-deadbolt models only; **not available on motorized latch retraction functions**)
- Deadbolt monitor (DM) (standard on electrified deadbolt models)

You can **configure and price a full range of products** using the tables and rules shown in this section.

The pricing of locks in this section includes the P6 cylinder in open keyway (where applicable), default strike and armor front and a 1-3/4" thick door. Additional modifications are available using the rules and price adjustments on the subsequent pages.

How to order:

- All applicable product attributes must be provided in the order shown below
- Each value must separated by a period
- If requesting a product "Less (LLL)" any attribute, the entire detailed ACN must be provided
- Fractions will be written with the "/" symbol separating the numerator and the denominator (example 1/2)
- For dimensions that contain a whole number and a fraction, a hyphen "-" will be added after the whole number and before the fraction (example 2-1/2)
- For two dimensions represented together, such as length and width, the values would be separated by an "x" with no spaces
- Finishes should be listed using their BHMA finish as shown in this book

L Series Distributor Pack program

Features

The Schlage Distributor Pack stocking program provides “flexible inventory” for the L-Series mortise lock. The Distributor Pack combines the versatile Schlage mortise lock with a variety of knob or lever options and finishes all for the same list price as a complete lockset. This allows you to maximize your mortise lock inventory dollars and meet your changing customer requirements.

The Distributor Pack is also easy to use. By combining a few different component parts, you can build a complete Schlage mortise lock.

How to build a mortise lock with the Schlage Distributor Pack

- STEP 1:** Choose lock case required. Schlage mortise cases must be ordered in multiples of 10 units each (quantity of 1 = 1 lock case).
- STEP 2:** Choose the knob/lever and rose/escutcheon trim designs and finishes. Order one design and finish in multiples of 4 or 10 units each (quantity of 1 = 1 set of outside and inside trim).
- STEP 3:** Choose the armor front (quantity of 1 = 10 armor fronts, packed 10 to a box).
- STEP 4:** Choose the strike (quantity of 1 = 10 strikes, packed 10 to a box).
- STEP 5:** Choose the cylinder, if required (quantity of 1 = 10 cylinders, packed 10 to a box).

These are the only component parts required to build a Schlage mortise lock. With five easy steps you can build your mortise inventory to be flexible and to respond quickly to your customers.

Miscellaneous parts in bulk quantities are also available for Schlage mortise locks with the Distributor Pack Program.

LM929x EL/EU electrified locks

All locks feature automatic detection and operation with 12 or 24V DC, and a case-mounted switch that allows customer selection of EL (fail safe - power failure allows either knob/lever to retract latchbolt and/or deadbolt) or EU (fail secure - power failure locks outside knob/lever or both knobs/levers). Please specify lock function as EL or EU for default switch position. Locks also come standard with Allegion Connect Molex connector with 3" lead and CON-6W. Allegion Connect is a Molex connector system that allows rapid installation of lock when used with Allegion Connect Harnesses (see page 231) and Allegion Connect Hinges (see Ives price book). For more information speak to your sales representative. The Molex connector can also be cut off so that the lock can be installed with traditional splicing. Request-to-Exit (RX) is not an available option for the LM9200 Series.

1. The CS200 product line transitioned from crimp-on roses (not removable to snap on roses (removable) in August 2015. The rose/lever combination needs to be considered for changing levers for locks with crimp-on roses. Snap-on roses can be identified by retention dimples at the base of the rose. If not compatible, an outside chassis with a crimp-on rose can be updated with the following items:

- 06-242 Kit, levers
- 08-029 Rose SAT PLY (snap on)
- A501-945 Ring reinforcing rose
- F206-496 Outside chassis assembly, interconnect

FIELD ASSEMBLED

BULK PACK

Key Large Jobs Faster!

Bulk Packs are kits that contain all of the components needed to build 10 cylinders. For added convenience the shells are pre-loaded with pins and springs and slid onto a follower. Cams and tailpieces are sold separately in economical 10-packs to maximize flexibility. **Keys and Primus components are also sold separately.**

The unit price of the unassembled cylinder is up to 15% less than buying it completely assembled. In addition to this savings, labor time is reduced since cylinders don't have to be taken apart before being pinned in the field. Not available in Faculty Restroom (hotel) functions. Must specify finish color, length and keyway.

Residential Keying

Residential Master Key (RMK): RMK is a single key that will grant access to all opening with in the facility (i.e. master key). Additionally, each tenant would need to be provided with a key that will grant them access to their apartment only. The same keying situation would exist in any form of a multi family housing complex.

Residential Construction Keying (RCK): RCK (also referred to as loss ball) by design allows the use of a temporary master key during the construction phase of a project. At the end of the construction phase, the use of the homeowner key will trigger the lost ball construction device, thus eliminating the temporary master key used during construction.
