

CO-220

Standalone classroom lockdown solution with remote fob and visual indicator

Added protection for students — reassurance for parents.

School systems today are looking to improve classroom security. A proactive approach ensures that the right preventative measures and emergency protocols are in place. Our expert Security and Safety consultants are available to partner with school personnel, security and safety committees and local law enforcement officials to develop a comprehensive security solution for your school.

Classroom lockdown is an important part of a comprehensive emergency response plan. The CO-220 is an affordable solution that allows immediate local lockdown by simply pushing the button on the remote fob from anywhere in the classroom. An illuminated visual indicator provides instant verification that the door is secured. The CO-220 provides a localized solution for schools that want to upgrade without the cost or complexity of a networked system.

With over 90 years of experience, Schlage is an industry expert in physical security. We offer a variety of products designed and tested to the highest standards in the industry to meet the unique needs of schools. Put our knowledge to work for you. Security consultants are available nationwide to advise on door hardware, access control and code compliance.

CO-220 classroom security lock options

The CO-220 classroom security lock is available with a variety of options to meet the specific needs of your school. You can assign PIN numbers, magnetic stripe or proximity cards to your staff members, instead of keys for access. For small campuses, the CO-220 lock can be manually programmed at the lock. For larger campuses, you can use offline access control software* which provides the ability to manage a database of access users, set schedules and capture audits. In both cases, remote fobs are paired at the lock; multiple fobs can be paired to a lock.

Cylindrical, mortise and exit trim chassis options are available, as well as a wide variety of finishes and lever styles to suite with your existing hardware. Mechanical key override is standard and compatible with multiple cylinder types. The CO-220 has been tested to the highest standards in the industry, including ANSI/BHMA A156.25 and is ANSI/BHMA Grade 1 certified and UL fire-rated.

Remote fob is convenient and easy to use

The remote fob can be worn conveniently around the neck or wrist so that it is immediately accessible by teachers and staff members. Lockdown of up to 10 paired locks within range can be instantly initiated by pressing the button on the fob from anywhere inside the room.

Visual indicator

When the button on the remote fob is pressed, the visual indicator illuminates to provide verification that the door is secured.
